LOCAL ITEMS.

LOCAL MINING REVIEW.

Though embracing reports from many mines, our review this week is not so complete as we hope to make it in future. In Pioche every branch of business is so completely dependent on the prosperity of the mines, that we believe information concerning their prospects and present condition will always be acceptable, and shall endeavor to supply it.

The amount of bullion for the week is \$50,084.16.

CHIEF OF THE HILL.—Mr. Wright, the Superintendent, is intelligently and steadily prosecuting the development of this mine. About ten tons of high grade ore are being raised daily from the second and third levels. On the third level the west drift is being pushed, also two winzes, which are being sunk at a distance of 100 and 200 feet from the main incline. Winze No. 1 is down 40 feet and is in ore from top to bottom. The quality of the ore is superior, assaying \$200 per ton. Winze No. 2 is down about 12 feet and presents the same characteristics as No. 1. It is intended to sink winzes at each 100 feet of the third level, which will be connected below, and the intervening vein matter stopped out. The Magnet mill is running steadily on the ore from this mine, which is yielding more favorable returns than was expected, though sanguine anticipations of a large yield were indulged. The general prospects of the mine are very bright, especially during the past month. Heavy preliminary expenses were necessarily incurred, so that the net returns may be expected to be sensibly increased.

MEADOW VALLEY.—Mr. Maynard, the new Superintendent of this company, is conducting operations most vigorously, yet with the cautious care so necessary for the successful conduct of the important interests entrusted to his charge. The mine is looking well and the new developments are well calculated to sustain the confidence of shareholders in the permanence and value of their property. The mill is kept steadily running with an abundant supply of ore, while care is taken to develop new sources from which to continue the supply. The works at the several shafts are being urged forward and drifts are being run connecting the several shafts. The exploration of that portion of the mine contiguous to the Raymond & Ely continues to be gratifying and induces the belief that the rich body of ore struck in the Lightner shaft may probably extend into the Meadow Valley ground. If this should prove to be the case the remarkable richness of this chimney will soon have a marked effect upon the company's dividends.

WASHINGTON AND CROOK.—New hoisting works have just been completed on this mine. The machinery is first class and has been put into position in a most creditable manner. There are two tubular boilers. The engine is a link motion with twelve inch cylinder by twenty-four inch stroke, and is rated at 30-horse power. The interior of the works is roomy and extremely well arranged as regards convenience for working, the whole being enclosed by a substantial building 65x36. The engine, &c., was set up by Mr. Salisbury and the carpenter work executed under the supervision of Mr. Trench, and is good evidence of the mechanical skill of those gentlemen. The incline is now 500 feet deep and is being well timbered, four or five tons of good ore being raised daily. P. C. Hyman, the Superintendent, is unremitting in his care and is in all respects attending to the interests of the company in a manner worthy of all praise.

PIOCHE POKER.—This company is sinking a vertical shaft with which it is expected to strike their vein in something over 400 feet from the surface. This will be a large shaft, in two compartments, heavily timbered and complete in all respects. Over it will be placed the new hoisting works, the machinery for which will reach here about the last of this month. Work on the incline is also progressing and has now reached a depth of 350 feet. This is sunk on the ledge, which yields some very rich ore. The Superintendent, Mr. D. Hardy, who furnished us these particulars, says that the vertical shaft was commenced on the 5th of September and has now attained a depth of 85 feet, which shows that he knows how to expedite matters and to work to the best advantage.

RAYMOND & ELY.—During the temporary absence of Col. Lightner, W. H. Clark is acting Superintendent, under whose attentive care everything is progressing in its accustomed good shape. The mine is looking as well as ever with but little noteworthy change. From 90 to 100 tons is being raised daily. The product of bullion is about \$12,000 per day. A cross course is being cut from the shaft to the sixth or 525-foot level. It is now over 50 feet and will take about 100 men in all to reach the level. About 300 men are employed in and about the mines. Altogether, in spite of bulls and bears and variations of the stock market the Raymond & Ely still keeps its proud pre-eminence as the most profitable mine on the Coast.

ARKANSAS.—The prospects of this mine seem to be quite flattering. Through the politeness of Henry Phillips, Superintendent, we are favored with the following information: The incline is 310 feet deep and the work of sinking is being rapidly pushed. Drifting is going on in the 120-foot and 250-foot levels, from which very fine ore is being taken—that from the 120-foot level assaying \$350. This drift is in 40 feet and shows a vein 3 1/2 feet wide. The lower level is in about 50 feet and yielding fine ore. Mr. Phillips is using his best endeavors to develop the mine.

MOUNTAIN VIEW is the name of a location recently made on the hill back of the Court House. An incline has been commenced and is now down 10 feet. The vein, which was very narrow on the surface, is now two feet wide at the bottom of the incline and shows considerable metal. The fact of finding this ledge is somewhat remarkable, as it is the first ore discovered on the hill west of town. The locators are Messrs. Breakley,

Wright, Smith and Hughes, to whom we trust it will prove a fortunate discovery.

AMADON TUNNEL.—Capt. Ketton, acting superintendent, tells us that the tunnel is now something over 200 feet in length. The work is being urged forward as rapidly as the nature of the ground will permit. About half-way from the mouth of the tunnel some rich ore was struck, and a shaft is being sunk on the vein containing it. It is down about 23 feet, and the vein shows well at the bottom. Assays have been made from the ore which gave big figures. As an example of the extreme richness of some of this ore, yesterday Capt. Ketton took eleven ounces Troy and had the silver extracted at the Assay Office, when, much to his astonishment, he received one ounce of silver, 925 fine, as the returns from the eleven ounces of ore. It is thought that the ledge, which is 2 1/2 feet wide, will average \$250 per ton.

PIOCHE.—On calling at the office of this company our reporter was most courteously received by Mr. John Nelson, the new Superintendent, who, in answer to inquiries concerning the workings of the mine, stated that the work of sinking the incline had been temporarily stopped—a depth of 460 feet having been attained. The work of stopping and drifting on the several levels was steadily proceeding, and that otherwise there was but little change to report.

FLORAL MILL.—The grading for this mill is nearly completed. A contract has been let for the mason work. A boarding house, blacksmith shop and office have been erected. The machinery is on the way, and under the energetic management of Mr. J. C. Clark, superintendent, seconded by the foreman of the mill, Mr. Hutchins, matters are progressing as rapidly as circumstances permit.

BALTIMORE.—Work is going on vigorously on this mine. The incline has reached a depth of 80 feet, showing a ledge at the bottom of about three feet 15 width. The vein carries considerable ore, which assays about \$125 per ton. From present appearances and the favorable situation of the mine—being located between the Ivanhoe and Townsend—the owners believe it will soon prove to be a valuable property.

MEADOW VALLEY EAST EX.—The lowest workings of this mine are about 170 feet from the surface. A straight shaft has been sunk 150 feet from that point, a cross-cut run 35 feet from the further extremity of which an incline is being sunk and is now 18 feet in depth. This incline is on the ledge, which presents quite a favorable appearance.

MARION.—Of this mine Mr. Charles Dale is Superintendent. The shaft is about 100 feet in depth. It is intended to form a station when the shaft attains a depth of 120 feet, from which point a drift will be started. The ledge is five feet in width in which rich ore is found assaying as high as \$300 per ton, with prospects of producing a goodly quantity.

KENTUCKY.—Respecting this mine, which is in litigation with the Raymond & Ely, we are favored with the following information: The shaft is now down about 360 feet. At the 330 foot level a drift has been run, in which a connection has been made with the workings of the Raymond & Ely.

PACIFIC TUNNEL.—Mr. Nichols, the Superintendent of this undertaking, informed us that the work was being urged forward and hopes ere long to reach the point aimed at. At present there is but little change to report. The tunnel is now 1,000 feet in length, and a contract has been let for another 100 feet.

PIOCHE WEST EX.—A large double shaft is being sunk on the claim and has now attained a depth of 200 feet. John P. Kelley is the Superintendent of the mine and also of the Spring Mount and Meadow Valley East Extension, and is prosecuting the work on all of them with diligence and economy.

KENTUCKY RIFLEMAN.—Still sinking, with the ledge improving in size and character. The present contractors expect to be down 100 feet in the course of the next 30 days. One of the gentlemen interested has gone East to raise working capital, in which it is to be hoped he will be successful.

PAGE & PANAMA.—Matters with this mine are without noteworthy change. Sinking and drifting are still going on, but without making any remarkable discoveries. Mr. M. W. Kales, the active superintendent, is now absent on a trip to the Bay.

PIOCHE CHAMPION.—The work on this claim is progressing rapidly. No. 1 shaft is down 80 feet, showing a large ledge. A second shaft, for working purposes, has been started, which is down some 35 feet, and is intended to strike the vein at a depth of 370 feet.

CHIEF OF THE HILL EAST EX.—This claim, which adjoins the famous Chief, is looking well. The incline is being sunk and is now 90 feet deep and is soon expected to cut the ledge. In other respects there is but little change to report.

SPRING MOUNT.—The shaft, which is a large double one, has reached a depth of 300 feet. Though not in ore at the present time it is expected to strike the ledge very shortly.

THE SPRING MOUNT TUNNEL is now in about 200 feet. Mr. George Phillips, the superintendent, is pressing operations with all the means at his command. He keeps the work going night and day.

LILLIAN HALL.—Drifting is going on about 70 feet from the surface. But a small force is at work, but some good ore is being taken out, and prospects look favorable.

INGOMAR.—The shaft is now about 420 feet deep. A contract has been taken to sink 100 feet deeper, at which the contractors are now at work.

KINROSS.—Work is for the present suspended in this mine. The shaft is now about 250 feet deep.

ARRIVALS AND DEPARTURES.

ARRIVALS BY GILMER & SALISBURY'S HAMILTON LINE. H Van Buskerf Mike Brannan Jas Reynolds Wm Butson J M Bellard Wm Echhoff L S Scott Wm Nichols F Caserly Thos Cokdon Father Monteverde BY GILMER & SALISBURY'S BALT LAKE LINE. W Clyde Mrs Clyde Mrs Buchanan John Jones Mrs Jones H Ashland Henry Stephens

ALMOST AN ACCIDENT.—Yesterday morning, at the Spring Mount mine, the workmen set off two blasts at the bottom of the shaft, which is nearly 300 feet deep. After waiting on the surface a short time only one of the blasts went off, and concluding that the other was a miss-fire, one of the men descended and again set fire to the fuse. After he had ascended and remained some time on the surface, it was concluded that the charge would not explode, and the workmen were about to be lowered in the shaft, when the blast at last went off. If it had exploded a few moments later, it would doubtless have caused a sad accident. Accidents from blasts which fail to explode when first fired, have caused many a hard-working man to lose his life or suffer permanent injury, and miners cannot be too cautious in approaching them until a considerable time has elapsed from the moment the fuse is fired.

THE REPUBLICAN PRIMARY went off without the occurrence of any very remarkable incident. There was a large crowd around the polls on Lacour street, with many persons peddling tickets, while the whole assemblage seemed to pay tolerably frequent visits to the saloons in the neighborhood, no doubt for the purpose of drinking ice water. There were two sets of delegates running, one of whom were supporters of Mr. Travis, the others were standing in for Mr. Hamilton. The latter came to grief, for, out of 483 votes, the total number cast, the Travis delegates received 396, while the Hamilton ticket only found 87 supporters, giving the Travis men a majority of 300.

DISTRICT COURT.—Samuel P. Weston, a native of England, was yesterday admitted to citizenship. Another writ of habeas corpus was sued out on the petition of F. Sonle, who escaped from Hamilton jail. The return was heard by Judge Fuller in chambers. Messrs. Foster and Bishop appeared for the petitioner and Col. Thornton for the State. After an able argument by the counsel, the Judge was intimating his intention of denying the petition when the defendant came forward and stated that he was willing to return to Hamilton in the custody of the Sheriff of White Pine County. This declaration of course ended the matter and left the lawyers nothing to squabble about.

QUICK STOCK REPORTS.—Mr. Cavellier informs us that reports of the prices of each particular stock are telegraphed thither immediately after they are called at the Board. Having this facility any operator can, on learning quotations, have such transactions as he may desire carried out, almost as certainly and easily as if he were actually in San Francisco.

TOOK THE HINT.—We are glad to notice that efforts are being made to clear up the litter and rubbish which has so long disfigured Main street. A number of the residents on that thoroughfare seem to have acted on the suggestion we made the other day, and it is to be hoped that the others will unite in given the principal streets of the town a neat and cleanly appearance.

NEW BAKERY.—Mr. Higgins, of the Arcade Bakery and Chop House, Main street, wishes his friends and the public to remember that his bakery will be in operation to-morrow. Orders for bread, pies, cakes, etc., are solicited, and will be promptly filled. Balls, wedding parties, hotels, restaurants and families supplied.

MEASURER GUARD.—The instruments for the band of this excellent military company have arrived per Wells, Fargo & Co.'s express. Captain Hanley says that the instruments are very fine ones and the company are highly pleased with their acquisition. The band will be formed from members of the company.

REGISTERED.—Last evening there were 763 names entered on the Register. This is but slow work and it is hoped that too many will not put off this important matter until the last day or two and then perhaps be crowded out on account of the number of applicants.

YESTERDAY we were favored with a call from Mr. J. M. Beltrude, Deputy Sheriff of White Pine County, who visits Pioche for the purpose of taking F. Sule back to Hamilton. Mr. Beltrude, who is an old friend, we are glad to say, looks as if the lapse of time passed over him without leaving its usual marks.

RETURNED.—Mike Brannan and Thos. Condon arrived yesterday's stage from Hamilton. These gentlemen were the escort to Morgan Courtney from Pioche to Virginia, to answer the charge of murder.

At Burrage's Drug Store, Main street, directly opposite Lacour street, is the largest and best assortment of pure drugs and patent medicines; also perfumery, fancy goods, paints, oils, turpentine, lamp chimneys, etc. oct-1m

Estrays Taken Up.

AT MY RANCH, KNOWN AS THE JACIMAN Ranch, situated about 15 miles from Bullionville, in Meadow Valley, about the 14th of June, 1872, one Roan Mare about seven years old and branded with the letter N on the left hip, went on left shoulder and branded C over the letter N on the left hip. Also one Brown Male Colt about 4 months old, with the mare, and also one Black Horse Mare about one and one-half years old, branded the same as the mare. Call, prove property, pay charges and take away. WILLIAM HOPKINS, Hopkinton Ranch, Sept. 12th, 1872. oct-1m

Bishop Bros. have just received a large and fine assortment of Perfumery, Toilet and Fancy Articles, such as Ferina, Pinand and Wright's Colognes, Lubin's and Phalon's Extracts, Florida Water, Pomades, Hair Oil, Cold Cream, Creme de Lis, Laird's Bloom of Youth, Buzin's Tooth Paste, Steinberger's Glycerine, Honey and Elder Flower Soap, Lubin's Soaps, etc., etc., which, together with a full stock of Chemicals and Medicines, are selling at the lowest market prices.

ASHIM BROS. MODUS OPERANDI FOR THE PEOPLE. THE LATEST AND THE BEST. THE BEST QUALITY OF GOODS IN THE MARKET AT ASHIM BROS. THE LOWEST PRICES.
